

ORGANOMETAL

Product Data Leaflet

Trade name: **Anfoam S**

Type of application: Anfoam S is a very effective defoamer for the emulsion paint manufacture.

Composition: Mineral oil, hydrophobic components, esters, and small amount of silicone.

Activity: 100% Non containing water.
Free of phenyl or alkyl ethoxylates.

Typical Properties

Appearance	Liquid
Viscosity cSt 25 °C	120 - 160
Odour	Characteristic (Mineral oil)
Colour	Light Yellow
Non - Volatile %	100
Density 20°C g/cm ³ .	0.870 - 0.890
Initial Boiling Point °C	>260
Flash point °C	190
Solubility	In organic solvents Dispersed in water
Solidifies at	> -20

Recommended levels

From 0.1 to 0.35% on the finished paint

Application

Normally the defoamer is added undiluted at the beginning of the paint mixing cycle in order a homogenous dispersion and de-aeration to be obtained.

In cases of long - term storage stir well before the application.
